SUMMARY

Result-driven software engineer with expertise in Node.js, React.js, and NestJS, skilled in Agile methodologies and delivering scalable, high-quality solutions through effective collaboration with cross-functional teams.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, Express.js, NestJS, Moleculer, TypeScript, JavaScript, HTML, CSS, gRPC
Databases: MongoDB, Redis, MySQL, PostgreSQL, AstraDB
Tools & Technologies: Microservices, AWS, Docker, Apache Pulsar, Temporal, Keycloak, CI/CD, Git, GitHub, Postman, Jira

EXPERIENCE

Hashstudioz Technologies June 2021 – Present
Software Engineer Noida, India

- Built and maintained scalable backend systems for 5,000+ users, reducing downtime by 40%.
- Delivered 30+ real-time APIs, improving response times by 35%.
- Automated deployment pipelines and access control systems, cutting release time by 50% and enhancing security.
- Integrated 10+ external services, reducing manual effort by 60% and tripling onboarding speed.

PROJECTS

Trabu | *NodeJS, Python, PostgreSQL, Apache Pulsar, AWS, Recombee, Hubspot* Feb 2025 – Present

- Trabu is a social travel platform where lets users discover destinations, plan trips, and generate personalized itineraries.
- Developed backend flows for itinerary generation, trip inquiries, and user experience management.
- Enabled real-time connection between users and local tour operators to automate trip planning.

Motonexa | *Typescript, Moleculer, Postgres, MongoDB, WATI, Keycloak, Stripe* January 2024 – Feb 2025

- Developed a B2B automotive platform connecting garages with car part suppliers to streamline procurement.
- Implemented end-to-end order management, including supplier quoting, commission tracking, and real-time order status updates.
- Secured platform access using centralized authentication and role-based access control powered by Keycloak.
- Managed a team of 5 developers, overseeing the implementation of real-time order tracking, WhatsApp chat via WATI, and in-app messaging for seamless garage-supplier communication.

Immunoact | *Nodejs, Nextjs, MySQL, AWS* March 2023 – January 2024

- Developed a platform to manage hospitals, doctors, patients, and multi-phase clinical trials for medicine development.
- Enabled trial tracking, appointment booking, and automated report flow from trials to labs.
- Built real-time chat using WebSockets for seamless communication across all roles.

FiveStone Taxwizard | *Nodejs, MySQL, AWS, Docker, Hubspot* June 2022 – Feb 2023

- Built a property tax platform for U.S. real estate, enabling users to input property details and estimate tax based on location, type, and size.
- Designed and implemented all tax calculation formulas based on client-provided rules to identify overassessed properties.
- Enabled users to raise formal tax appeal requests to local courts directly through the platform.

EDUCATION

Maharaja Surajmal Institue of technology - 7.5 CGPA New Delhi, India
Bachelor of Technology in Computer Science and Engineering 2016 – 2020

S.R.S Public School - 90.2% Rohtak, India
Senior Secondary (12th Grade) 2015 – 2016

Shri Baba Mast Nath Public School - 9.0 CGPA Rohtak, India
Secondary (10th Grade) 2013 – 2014
